

I DON'T JUST USE AI TO GET ANSWERS.

I use AI to learn, build, test, question and create - with a student perspective on what actually works.

PORTFOLIO / LIVE SITE ·

SELECTED WORK

- 01

NyreeOS / RetailOS

PRODUCT BUILDING

Pharmacy operating system shaped around a real workflow: billing, inventory, supplier purchases, customer credit, hold orders and reporting.

REAL PROBLEM

PROTOTYPE

AI-ASSISTED

OPEN ↗
- 02

Media Kit + Brand Operations

CREATOR / CONTENT

Built Pranjal Kumar's media-kit website from scratch with Claude; also work on brand discovery, outreach and audience perspective.

CLAUDE

BRAND RESEARCH

OUTREACH

OPEN ↗
- 03

VeloTask

WEB + APP

Productivity experience with task management, focus sessions, timer controls and activity tracking - shipped as a website and APK.

WEB

APK

FOCUS

OPEN ↗
- 04 / EARLIER BUILD · BIHARI BITES

Recipe website kept as an earlier build to show progression in web development.

CAPABILITIES

- 01

AI-ASSISTED BUILDING

Use AI inside planning, coding, debugging and iteration.
- 02

WEB + APP

HTML/CSS/JS projects plus APK-based product work.
- 03

PRODUCT THINKING

Start from real user problems, requirements and workflows.
- 04

CONTENT OPERATIONS

Brand research, outreach and audience-oriented feedback.

AI IN PRACTICE

AI IS A TOOL. THE WORKFLOW IS MINE.

I don't position myself as an "AI expert." I focus on using AI deliberately inside real workflows.

STUDY Explain → practice → quiz → revise	CODE Review → understand → fix → test
RESEARCH Question → compare → cross-check	BUILD Problem → prototype → test → iterate

MY AI POINT OF VIEW

AI WILL BECOME EVERYDAY COMPUTING.

I think AI will move from a special skill to an everyday tool - much like computers became tools across almost every kind of work.

COURSE TESTING / LEARNER LENS

Clarity · Practicality · Confusion · Tool testing · Relevance · Perspective

I look for the point where a real student may pause, lose context or fail to reproduce a workflow.

AI BUILD LOG

01	02	03	04
ABHISHEK	CHATGPT	CLAUDE	ABHISHEK
defines audience, evidence and final decisions	structures, implements and iterates	independent design critique and challenge	tests, edits, rejects and rebuilds

WHAT I CAN CONTRIBUTE

COURSE TESTING · AI WORKFLOW RESEARCH · STUDENT FEEDBACK · CONTENT RESEARCH · PRODUCT BUIL
